

What Is Claimed Is:

1. A medical gown, comprising a nonwoven compound fabric,
said nonwoven compound fabric comprises a nano-denier barrier layer
comprising a plurality of continuous thermoplastic filaments having a denier of
5 less than about 1000 nanometers, a secondary barrier layer, and a substrate
layer.

2. A medical drape, comprising a nonwoven compound fabric,
said nonwoven compound fabric comprises a nano-denier barrier layer
comprising a plurality of continuous thermoplastic filaments having a denier of
10 less than about 1000 nanometers, a secondary barrier layer, and a substrate
layer.
